Tech enthusiast, 24 years old young mind with 2+ years of professional experience in software development. Fast learner. Craving for experience.

EXPERIENCE

- **ESSENTIALS**
  - Experience working in teams
  - Experience working with multiple parties on a single Git repository and using git submodules
  - Problem solving skills
  - Test Driven Development
  - Developing various automation scripts
- **DESIGN**
  - Designing systems from scratch
  - Deciding on suitable technology stacks for web development on both backend and frontend
  - Working with scalable architectures such as Modular design, Dependency injection and Reactive programming
  - Deciding on normal and edge case test scenarios
- **BLOCKCHAIN**
  - Experience with DeFi environment and tools
  - Understanding of most prominent ERC/EIP Ethereum standards
  - Reading Solidity smart contracts and building JavaScript APIs for them
  - Understanding of essential security concerns of smart contracts
  - Handling Web3 aspects on frontend
  - Analyzing DeFi projects to decide on their general security and aspects of decentralization and trustlessness
- **BACKEND**
  - Building REST APIs
  - Managing Linux servers and production environments
  - Containerizing applications with Docker
  - Designing databases
- **FRONTEND**
  - Taking advantage of RxJS technology that offers real reactive behavior to handle the shortcomings of ReactJS in terms of reactivity
  - Use of parameterizing in different aspects of the program
  - Advanced animation implementation
  - Taking advantage of Modular and Atomic design
  - Designing reusable, maintainable, open for extension and context free components
  - UI / UX Design and Prototyping
  - Configuring build tools for optimization and deployment requirements
  - Work with and Edit vector graphics

Currently working on a decentralized game project as the Web3 frontend developer and UI/UX designer at enga.land.

SKILLS

Linux

Git

JavaScript / NodeJS

TypeScript

Solidity / EthersJS

Svelte

ReactJS / NextJS

ReactiveX / RxJS

GSAP / WobbleJS

Docker

HTML / CSS / SASS / Tailwind

Figma / Adobe XD

SQL

Mocha-Chai / Puppeteer

Familiarity with other general purpose programming languages and design patterns

LANGUAGES

English

EDUCATION

Bachelor

September 2015 - August 2019

Software Engineering
